# THE WAVE

## GLASGOW 5.12.09

### Welcome to The Wave!

**Stop Climate Chaos Scotland would like to thank you for taking part. Together we have a strong and clear voice on climate change.**

It's December, and the international climate change talks in Copenhagen are finally upon us. We have a clear message for our UK political leaders. We want them to:

#### Share Scotland's ambition

Earlier this year, the Scottish Parliament passed the most progressive climate change legislation in the world. We want the UK government to ensure that developed nations commit to at least the same ambition as Scotland.

#### Protect the poorest

The world's poorest people are being hit first and worst because of emissions produced by rich countries, including the UK. We call on the UK Government to provide our fair share of additional resources that are needed to help people in poor countries adapt to climate change and establish low carbon energy sources.

#### Act fair and fast

The UK has a historical responsibility for climate change and we need to make deep cuts in our emissions straight away. The UK must commit to reducing its carbon emissions by at least 42% by 2020 through and call on other rich countries to do the same.
